

## Waterjet Cutting Service

Utilizing a CNC machine, a high-pressure stream of water (or a water and abrasive mix), cuts through virtually any material with extreme precision. The waterjet is capable of producing basic shapes or complex designs, and is suitable for generating one-of-a-kind creations or exact duplicates in multiples. There are endless possibilities!

- Cardboard to Wood
- Plastic to Glass
- Brass to Steel
- Stone to Marble
- Aluminum to Stainless

## Waterjet Cutter Specifications

**Cutting Strength:** 55,000 PSI

**Bed Size:** 5' x 10'

**Material Thickness Capability:** .010" – 5.0"

## How Can We Help?

If you have a project in the pipeline, or one that's been sitting on your desk with a big "how do I achieve that" question over it, why not get in touch and see what we can do.
